PROFESSIONAL SUMMARY

Motivated and detail-oriented IT professional with 2 years of experience in Quality Analysis, Python Full Stack Development, and internship experience as a Python Developer. Skilled in developing scalable web applications, software testing, identifying defects and data-driven software engineering. Seeking an opportunity to apply technical and analytical skills to high-impact products.

EXPERIENCE

RMC Govt. -- Quality Analyst (December 2024 - July 2026)

- Working on the Government Paddy Management System, performing system-level quality analysis and validating application functionality.
- Audited backend processes, database records, system transactions, and generated outputs to ensure accuracy and compliance.
- Identified bugs, data mismatches, and functional issues during system testing; verified bug fixes and end-to-end integration.

SEEREE, Bhubaneswar -- Python Full-Stack Development Intern (June 2023 - October 2024)

- Developed and deployed full-stack web applications using Python, Django, Flask, HTML, CSS, JavaScript, and Bootstrap.
- Engineered RESTful APIs, database schema operations, and integrated third-party services.
- Utilized Git and GitHub for version control, collaborative branching, and production deployment.

PROJECTS

Student Management System & QA Chatbot -- Python + Flask + MySQL + RAG

- Built an intelligent QA chatbot using Retrieval-Augmented Generation (RAG); achieved 90% test accuracy with in-memory caching.

Student Marks Prediction System -- Python + Scikit-Learn + Flask

- Implemented regression model predicting student academic performance based on study hours and attendance; 92% R2 score.

Electronic Hospital Management System -- Python + Django/Flask + MySQL + REST API

- Created full-featured healthcare portal for patient records, doctor appointment scheduling, and automated billing.

Sales Data Analysis Dashboard -- Python + Pandas + SQL + Power BI

- Cleaned and analyzed retail sales datasets with Pandas; designed interactive dashboards for revenue and profit trend tracking.

Paddy Moisture Detection System -- Python + Machine Learning + IoT Data Analysis

- Developed classification engine to evaluate paddy moisture levels and recommend procurement suitability based on sensor metrics.

EDUCATION

B.Tech in Computer Science and Engineering -- NM Institute of Engineering and Technology (2018 - 2022) | CGPA: 8.00
Intermediate Science -- Ganesh Institute of Technology, BBSR (2016 - 2018) | 54.5%
Matriculation -- Laxmi Baraha High School Hatina (2015) | 74.5%

TECHNICAL SKILLS & CERTIFICATIONS

- Languages: Python, JavaScript, HTML5, CSS3 | Frameworks: Flask, Django, React, Bootstrap 5
- Data Science & ML: NumPy, Pandas, Scikit-learn, Statistics, Matplotlib, Seaborn, EDA
- Databases & Tools: MySQL, SQLite, MongoDB, Git, GitHub, VS Code, Excel, Power BI | Networking: TCP/IP, HTTP/HTTPS, REST APIs
- Certifications: EY & Microsoft AI Skills Passport | Future Agents Agentic AI Assessment | LLM for Young Developers
